

Substitute Abstract

A method of intermediation services providing an efficient market for a class of financial products in which transactions occur in distinct origination and secondary sectors, the method including outputting a pricing schedule providing credits for transactions fees paid in one sector for redemption against the transaction fees for the other. An embodiment includes offering information, captured in the course of providing intermediation services, at prices that are reduced as transaction fees increase. The method of the invention provides an efficient market for the provisioning of financial products that not only invites lenders, loan seekers, loan traders, offerors of lines of credit, seekers of lines of credit, traders of lines of credit, insurers, insurance seekers, and reinsurers to patronize a system employing the method, but which has conventions that induce them to patronize the system employing the method. The invention further contemplates the system employing the method.
